DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09 April 2008 has been entered.

Status of the Claims

2. Claims 110-127 are pending.

Claims 110-116 and 118-121 are rejected.

Claims 117 and 122-127 are objected to.

Priority

3. The applicants claim for priority filed 28 February 2008 has been entered. The benefit of priority to application numbers 09/640953, 09/054832, 09/431385, and 09/054830 is not granted relevant to the instant claimed subject matter because the applications do not fulfill the requirements of 35 U.S.C. 112, first paragraph regarding nearest neighbor analysis. Therefore the granted priority date for the instant claimed subject matter is that of application no. 09/724959, 28 November 2000.

Claim Rejections - 35 USC § 101

Art Unit: 1631

4. The rejection of claims 110-127 under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter in the Office action mailed 28 November 2007 is withdrawn in view of the amendment entered 09 April 2008.

Claim Rejections - 35 USC § 112

5. The rejection of claims 110-117 and 119-127 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention in the Office action mailed 28 November 2007 is withdrawn in view of the amendment entered 09 April 2008.

Claim Rejections - 35 USC § 102

6. The rejection of claims 110, 114, 115, and 123 under 35 U.S.C. 102(b) as being anticipated by Griffin et al. (Analytical Biochemistry, Vol. 260, pages 56-63, 1998) in the Office action mailed 28 November 2007 is withdrawn in view of the amendment entered 09 April 2008.

Double Patenting

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference

claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 110-116 and 118-121 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-2, 6-9 of copending Application No. 10/176,972. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would be obvious to design the oligonucleotide sequence predicted by the method of Application No. 10/176,972, and because the melting temperature determination of the method of Application No. 10/176,972 is a species of the duplex stability measurement of instant claim 110.

Art Unit: 1631

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

9. Claims 117 and 122-127 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
